Profil

Software Engineer lulusan Teknik Informatika Universitas Muhammadiyah Kalimantan Timur (IPK 3.86) dengan fokus pada pengembangan perangkat lunak berbasis web dan perancangan antarmuka pengguna (UI/UX). Memiliki pengalaman profesional dalam merancang arsitektur sistem end-to-end hingga tahap deployment. Rekam jejak saya mencakup keberhasilan membangun ekosistem aplikasi terpadu serta platform dinamis yang mempercepat transformasi digital dan meningkatkan efisiensi operasional instansi secara terukur. Didukung oleh fundamental pemrograman frontend dan backend yang solid menggunakan berbagai framework (Next.js, Django) serta perangkat pengembangan (Figma, GitHub). Saya siap berkontribusi menghadirkan solusi teknologi yang inovatif

Pendidikan

Universitas Muhammadiyah Kalimantan Timur <i>S1 Teknik Informatika IPK (3.86/4.00)</i>	2021 – 2025
SMA Negeri 1 Kota Bangun <i>MIPA Nilai Rata-rata (83.25/100)</i>	2018 – 2021

Pengalaman Kerja

IT & Web Developer Intern Prodi TI – Universitas Muhammadiyah Kalimantan Timur	April 2023 – September 2023
- Merancang antarmuka pengguna yang intuitif dan responsif untuk sistem LMS menggunakan Figma. - Membuat dokumentasi teknis lengkap meliputi Unified Modeling Language (UML), Entity Relationship Diagram (ERD), Data Flow Diagram (DFD), dan Flowchart. - Menggunakan Draw.io untuk pemodelan arsitektur sistem agar alur antara frontend dan back-end terintegrasi dengan baik. - Berpartisipasi dalam diskusi tim, evaluasi desain, dan perbaikan sistem dengan pendekatan Agile Development	
Pranata Komputer (MagangHub) – Balai Besar POM di Samarinda	November 2025 – Mei 2026
- Merancang dan meluncurkan 15 aplikasi terintegrasi berbasis Web untuk mengotomatisasi proses bisnis instansi menjadi sepenuhnya paperless. - Membangun platform Website Builder dinamis menggunakan Next.js, Supabase, dan MySQL, serta mengintegrasikan API Gemini AI pada chatbot layanan publik. - Mengembangkan ekosistem aplikasi operasional internal untuk otomatisasi manajemen inventaris, data laboratorium, dan administrasi kepegawaian. - Melakukan troubleshooting sistem, bug fixing secara berkala	

Hard Skill

- Python programming
- PHP
- Django (Python)
- Laravel Framework
- Unity Engine
- C++
- CSS
- MySql
- Figma
- Git
- Next.js
- Supabase
- Google AppSheet
- Google Apps Script

Soft Skill

- Komunikatif dan mampu bekerja sama dalam tim
- Disiplin dan cepat beradaptasi
- Teliti dan bertanggung jawab
- Kreatif serta memiliki inisiatif tinggi

Bahasa

- Indonesia (Bahasa Utama)
- English (Intermediate)

Profile

Results-driven Software Engineer with a degree in Informatics Engineering from Universitas Muhammadiyah Kalimantan Timur (GPA: 3.86). Specializing in web-based software development and UI/UX design, with proven professional experience in designing end-to-end system architectures through to deployment. Demonstrated track record of building integrated application ecosystems and dynamic platforms that drive digital transformation and measurably enhance operational efficiency. Backed by solid fundamentals in frontend and backend programming utilizing frameworks such as Next.js and Django, alongside development tools like Figma and GitHub. Highly motivated to leverage technical expertise to deliver innovative technology solutions.

Education

Universitas Muhammadiyah Kalimantan Timur

2021 – 2025

Bachelor of Informatics Engineering | GPA (3.86/4.00)

SMA Negeri 1 Kota Bangun

2018 – 2021

Natural Sciences (MIPA) | Average Grade (83.25/100)

Work Experience

IT & Web Developer Intern –

Informatics Engineering Study Program, Universitas Muhammadiyah Kalimantan Timur

April 2023 – September 2023

- Designed intuitive and responsive user interfaces for a Learning Management System (LMS) utilizing Figma.
- Created comprehensive technical documentation, including Unified Modeling Language (UML), Entity Relationship Diagrams (ERD), Data Flow Diagrams (DFD), and flowcharts.
- Utilized Draw.io for system architecture modeling to ensure seamless workflow integration between frontend and backend systems.
- Participated in team discussions, design evaluations, and system improvements applying Agile Development methodologies.

IT Intern (MagangHub) – Balai Besar POM di Samarinda

November 2025 – May 2026

- Designed and launched 15 integrated web and AI-based applications to automate the agency's business processes, achieving a fully paperless ecosystem.
- Built a dynamic Website Builder platform using Next.js, Supabase, and MySQL, and integrated the Gemini AI API to power a public service chatbot.
- Developed an internal operational application ecosystem for the automation of inventory management, laboratory data processing, and personnel administration.
- Conducted regular system troubleshooting, maintenance, and bug fixing to ensure optimal performance and security.

Hard Skill

- Python programming
- PHP
- Django (Python)
- Laravel Framework
- Unity Engine
- C++
- CSS
- MySql
- Figma
- Git
- Next.js
- Supabase
- Google AppSheet
- Google Apps Script

Soft Skill

- Excellent communication and teamwork skills
- Highly disciplined and adaptable
- Detail-oriented and responsible
- Creative with strong initiative
